Cyber Resilience Act (CRA) Compliance Training

This course provides a comprehensive introduction to the EU Cyber Resilience Act (CRA) and its impact on digital product compliance. Participants will learn about the scope of the regulation, obligations for manufacturers, importers, and distributors, and conformity assessment and incident reporting requirements. Practical case studies and workshops will guide Malaysian companies in building compliance roadmaps aligned with their EU market-entry strategies.

SPEAKER BIO

Julian Meroi, CISSP

EU Compliance Consultant

Experienced Information Security Engineer skilled in incident response, vulnerability assessment, and European compliance. Proven ability to optimize security processes and implement secure systems and cloud environments.

Why Critical?

Mitigate Risk: Understand the heavy non-compliance penalties and how to avoid them.

Market Continuity: Ensure your products remain eligible for the EU market.

Operational Excellence: Integrate "Security by Design" into your R&D lifecycle.

WHAT YOU WILL LEARN

- **CRA Framework Essentials:** In-depth analysis of security-by-design, conformity assessments, and the CE marking process.
- **Reporting Obligations:** Managing mandatory incident reporting and vulnerability disclosures.
- **Lifecycle Management:** Practical steps for documentation, automated updates, and long-term support.
- **Implementation Roadmap:** How to build an internal compliance framework that sticks.
